

Hana GIN

Multiple Award Winning Gin

- Hana is the Japanese word for “Flower” which inspires its unique flavor profile of fresh lavender, bright citrus and juniper
- Hand bottled at our craft distillery in San Francisco, CA, a converted military prison
- Keeping with the Japanese ethos of simplicity, Hana is made with only 4 botanicals: orange and lemon peels, Albanian Juniper berries and lavender
 - Most gins have 15 – 30 botanicals, obscuring the characteristics of individual ingredients
- Rare vacuum distillation technique: we distill using pressure to lower our distillation temperature to avoid over cooking our carefully sourced ingredients
 - Orange peel, lemon peel, Albanian Juniper and Lavender are each distilled one at a time, under specific conditions

Awards: Awarded 94/100 points by Wine Enthusiast in August, 2015; 92/100 Points by the Tasting Panel; #1 Gin - 10bestgin.com; Gold medal award - Alcohol Aficionado
